

# Managed Migration Services

Let us simplify your move to the cloud.

“With over 1500 test and live customer failovers in 2019, iland has the highest level of expertise to help customers transition environments through managed migration”.

---

## Why do it yourself when you can have experts to it for you?

iland managed migration services provide an expert approach to handle migration complexity so you don't have to. Industry-leading migration technologies and best practices are applied by the experts who know them best—ensuring your smooth transition to our Secure Cloud. iland's Cloud Services team will engage with you to assist with migrating workloads to an iland Cloud (Secure Cloud or Secure Private Cloud).

## Why consider migration services?

- To improve the efficiency and dependability of IT operations
- Enhanced security and compliance
- Free up IT staff to work on strategic projects
- Cover for lack of in-house IT capabilities for certain functions
- Predictable pricing and manageable costs

## Why iland managed migration services?

Working with an experienced migration partner like iland can reduce risk, ensure the job is done right the first time with reduced errors and increased efficiency. You most likely have competent and highly capable IT staff, but it's unlikely you have hundreds of migration projects under your belt. iland will provide what is needed from start to finish with:

- World-class experience
- Award-winning tools
- Proven Methodology

In addition, complete documentation is provided:

#### **CONNECTIVITY DESIGN DOCUMENTATION**

Technical documents and/or diagrams providing engineering level information and configuration details for the purpose of interconnecting the Customer Primary Site(s) to the designated Provider Site(s) delivering the service capabilities.

#### **MIGRATION PROVISIONING FORM**

A detail discovery document used for information gathering and collection of all Customer specific technical and infrastructure related information for the sole purpose of the Provider delivering the migration service as part of the service contract.

#### **ON-BOARDING PROJECT PLAN**

A documented detailed overview of all tasks associated with the Provider on-boarding process for interconnectivity and delivery of the migration services from the Customer Primary Site(s) Workloads within scope of the mutually agreed upon service contract. The purpose of this document is to track ownership, progress and completion of all applicable on-boarding tasks in collaboration between the Customer and Provider.

#### **MIGRATION ACTION PLAN**

A disaster recovery process document providing enhanced details for all steps and tasks required for proper migration of the Customers replicated Workloads to the designated Provider Site(s). Additional details include task ownership, estimated/ actual task duration times, and Customer specific and managed application acceptance criteria testing processes. This document is developed and managed in collaboration between the Customer and Provider.

When you choose iland for a managed migration service, you're getting a dedicated team with that unique combination of consulting and operational expertise for a smooth-running project. Our experienced consultants are involved alongside you at every step for a faster setup and production, and our services are designed to enable you to focus on projects and users, not the migration details. Our process for migrating has been proven in all size environments, and no amount of data is too large or too small. iland's managed migration services ensure that key applications are smoothly migrated to minimize risk in order to protect your core business.

**Protect business. Power innovation.**
