

your application – in the iland cloud

Many applications are hosted in clouds today – but their performance, reliability and quality rests, in part, on the infrastructure underlying those clouds.

supporting applications around the world

iland has 18 years of experience with IT, serving global customers and hosting critical workloads, both for internal IT organizations and software-as-a-service companies. With data centers in Europe and across the United States, iland has an established global footprint. In the coming year, iland is continuing to expand to Asia Pacific, and adding more data centers in EMEA as well.

uncompromised performance

One benefit of the architecture of the iland cloud is an operating environment insulated from noisy neighbors. Each application is entitled to its own dedicated resources, and isn't impacted by the behaviors of other applications sharing the same hardware. This ensures application performance is consistent and reliable over time.

state-of-the-art technology

Our experience has shaped iland into a customer-centric organization, driven by our users to innovate and bring the best new technologies into our portfolio. With that goal in mind, the iland cloud is built on best-of-breed technologies, including VMware virtualization, Cisco servers and networking, and Dell Compellent storage. Our partner portfolio continues to grow and change to meet the needs of our customers.

security and resilience

Your data is critical to your business so iland makes safety a top priority:

- Our US locations hold SSAE 16 certification. Our EMEA locations hold ISO 9001/27001 certifications.
- Data is encrypted as it travels across the wire using AES-256 encryption
- 100% infrastructure SLA supported by 7 day backups of all machines and data
- Applications and data remain in their designated countries, ensuring data sovereignty choices remain intact

With iland cloud supporting your application, you can focus on your business, not the infrastructure.

iland, by the numbers

- ▶ 18+ years supporting customers and their critical workloads
- ▶ 95%+ customer satisfaction rating for iland Cloud Support – with representatives at each cloud location
- ▶ 7 global data centers in NA and EMEA, with growth plans in EMEA & APAC
- ▶ 3 VMware Partner network awards, Global & Americas
- ▶ Consultative customer relationships with the flexibility to meet your business needs

About iland

With data centers in the U.S. and U.K., iland delivers proven enterprise cloud solutions that help companies do business faster, smarter and more flexibly. Unlike any other provider, iland's technology and consultative approach mean anyone—regardless of expertise, location or business objective—can experience the benefits of a hassle-free cloud.

From scaling production workloads, to supporting testing and development, to disaster recovery, iland's secure cloud and decades of experience translate into unmatched service. Underscoring the strength of its platform, the company has been recognized as VMware's Service Provider Partner of the Year, Global and Americas
