

**BaaS**  
Secure Cloud Backup

# Secure.

Cost-effectively defend your data—and protect your business.

iland Secure Cloud Backup offers a streamlined and cost-effective solution for offsite backups.

The most important advantage of Backup as a Service (BaaS) compared to on-premises data backup solutions is the ease of management. There is no need to rotate storage devices, manually move data to off-site locations, perform integrity checks, or deduplicate. iland Secure Cloud Backup takes care of everything.

## Running out of storage is not an option.

iland Secure Cloud Backup with Veeam Cloud Connect features cloud storage that provides elasticity when on-premises equipment reaches maximum capacity. Backups are critical to your business because there's never a good time to run out of storage.

Backing up data to traditional equipment can sometimes be problematic. Tape backup that needs to grow quickly can be challenging and labor intensive. For disk nodes, backing up to another data level often forces an upgrade. Secure Cloud Backup takes away those difficult breakpoints so that organizations won't need to worry about distinct increases.

## Focus on business objectives.

Most organizations want to free themselves from building and maintaining "stuff." The more you can outsource tasks that aren't part of your business statement, the more you can focus on initiatives that will really move your business forward. iland and Veeam would like to help you spend more time managing and leveraging your digital assets, not managing backups.

iland Secure Cloud Backup provides the automation and orchestration necessary to simply and effectively protect your critical business workloads.

### Key benefits.

- Lower total cost of ownership (TCO)
- Improved speed of data recovery
- More secure method of file transfer
- Better use of IT resources
- Greater compliance safeguards
- Eliminate tape-based storage
- Scalable for explosive data growth
- Lower risk of data loss

### iland Insider Protection guards against:

- Accidental/Malicious deletion
- Data load or sync issues
- Insider threats
- Ransomware

### Industry leaders in data protection.

By migrating to a cloud service, organizations can move away from capital expenditure and simplify the process of protecting their vital information. Choosing iland for your business means that an industry leader in data protection is looking after your data. The global iland cloud platform delivers the needed automation and orchestration to protect your critical business workloads.

### Data protection.

The leading causes of data loss are similar in just about every type of business. Most people believe that once they save their data in a computer, it's safe and can always be accessed. The reality is that you must back up your data—because data loss is unpredictable.

### Trusted partner.

- 24x7x365 exceptional customer support with in-region phone support
- Straight-forward consumption model
- iland accreditations will meet your compliance needs
- Fully encrypted backups in flight and at rest
- Part of full-suite of data protection solutions
- Largest global Veeam Cloud Service Provider

#### About iland

iland is a global cloud service provider of secure and compliant hosting for infrastructure (IaaS), disaster recovery (DRaaS), and backup as a service (BaaS). They are recognized by industry analysts as a leader in disaster recovery. The award-winning iland Secure Cloud Console natively combines deep layered security, predictive analytics, and compliance to deliver unmatched visibility and ease of management for all iland cloud services.
