

# Protect.

Mind the gaps in your data protection with iland Secure Cloud Backup for Microsoft 365.

With adoption of Microsoft 365 growing at double-digit rates, uncertainty over responsibilities for data retention and compliance is increasing vulnerabilities.

With Microsoft 365, protection is a shared responsibility. Microsoft supports application and infrastructure uptime—but data control and protection is your responsibility. Microsoft even recommends third-party data protection in their service agreement: “We recommend that you regularly backup your content and data that you store on the services or store using third-party apps and services.”

Fortunately, there is a single solution that can prevent, or mitigate, common threats. By adding iland Secure Cloud Backup for Microsoft 365, you can protect valuable emails, contacts, and files in Exchange, SharePoint, and OneDrive from the worst results of ransomware, insider attacks, and catastrophe. The right cloud-based backup solution allows you to eliminate Microsoft 365 data retention and compliance gaps while allowing your organization to fully satisfy compliance requirements.

## Why do Microsoft 365 users need to back up their data?

- Microsoft 365 data is prone to user error
- Internal threats increase data risk
- Ransomware prevention is not enough
- Data retention gaps risk non-compliance
- eDiscovery and legal hold functionality are lacking

## Defend your data wherever it lives.

If you've made the business decision to deploy Microsoft 365, the iland Secure Cloud backup solution offers you visibility and control of your Microsoft 365 data—while avoiding the risk of data loss.

# 365

Secure Cloud Backup  
for Microsoft 365

## iland Secure Cloud Backup for Microsoft 365 delivers unmatched visibility and control while ensuring all your critical data is compliant and secure.

### Use cases:

Comprehensive, scalable, and cost-effective cloud backup protects Microsoft 365 data from these scenarios:

- If users overwrite or lose data, then it's restored quickly
- If ransomware corrupts data, then pristine, uninfected versions are readily available
- If Industry regulations dictate data retention, then you're covered thanks to unlimited retention
- If litigation requires immediate access to user data, then you have it
- If employees with malicious intentions hide or delete data, then you've already safely backed it up

### Reduce risk with security and compliance.

The iland Secure Cloud backup solution does all of the above while providing "true data isolation in an air-gapped environment outside of Microsoft 365"—which is critical from a risk and compliance standpoint.

### Veeam's #1 Cloud Backup Provider.

By combining the power of Veeam's backup tools with the iland Secure Cloud, iland Secure Cloud Backup for Microsoft 365 can help you safeguard against external threats and keep data protected from deletion and loss.

### Multiple recovery options.

In the event that something does go wrong, iland Secure Cloud Backup for Microsoft 365 offers multiple ways to recover:

- Restore mailbox, SharePoint, and OneDrive data directly into Microsoft 365
- Export objects to a Personal Storage Table (.pst) file
- Save Exchange items as a Microsoft Exchange Mail Document (.msg) file
- Send items as attachments to specific recipients
- Directly download individual objects as files or groups of objects as a .zip file

#### About iland

iland is a global cloud service provider of secure and compliant hosting for infrastructure (IaaS), disaster recovery (DRaaS), and backup as a service (BaaS). They are recognized by industry analysts as a leader in disaster recovery. The award-winning iland Secure Cloud Console natively combines deep layered security, predictive analytics, and compliance to deliver unmatched visibility and ease of management for all iland cloud services.
