

Ob
Secure Cloud Object Storage

Preserve.

Get secure, cost-effective, and scalable data retention with cloud object storage.

Securely extend your on-premises storage to the cloud and simplify long-term management of your data archives.

As your business moves toward petabyte-scale data storage, iland Secure Cloud Object Storage provides a cost-effective solution for long-term, secure storage of backups, cloud tiering to reclaim local capacity of on-prem data with flexible latency requirements, and other cloud storage needs. Plus, with immutability, you can protect your archive data from ransomware and other threats.

iland Secure Cloud Object Storage offers an all-inclusive model, which makes cloud pricing transparent. iland's comprehensive, built-in security and compliance, as well as our decades of IT experience, mean you can have peace of mind knowing your data is protected for future use.

Simplify data management.

Secure Cloud Object Storage is fully integrated with our Secure Cloud Console, so you can manage all of your iland solutions from a single, unified platform. Our infrastructure provides powerful tools, including:

- Full S3 compatibility
- Data immutability to prevent data deletion or modification
- High-performance data storage, with fast object retrieval and recovery
- Scale-out architecture to support your organization's growth

iland
AN IHI SYSTEMS COMPANY

Object storage is ideal for long-term retention, tape replacement, cloud tiering, big data storage, and legal and compliance archiving.

Benefits:

Rapid scalability

Flexible, cloud-based storage platform supports all your changing data storage needs.

Flexible data management

Data versioning helps you manage which point-in-time files to keep, amend, or delete in your object store and retrieve previous versions on demand.

Security

Full support for server-side encryption—so you own the keys to your data—along with Object Lock compatibility so you know your files are secure.

Data availability

All data objects are available 24x7 with a 100% availability service-level agreement (SLA).

World-class data centers and infrastructure

Our global data centers are designed to meet the highest standards for security, compliance, and performance. iland's enterprise-grade cloud architecture is built from the ground up with proven technology from VMware, HPE, Cisco, and others.

About iland

iland, an 11:11 Systems company, is a global cloud service provider of secure and compliant hosting for infrastructure (IaaS), disaster recovery (DRaaS), and backup as a service (BaaS). They are recognized by industry analysts as a leader in disaster recovery. The award-winning iland Secure Cloud Console natively combines deep layered security, predictive analytics, and compliance to deliver unmatched visibility and ease of management for all iland cloud services.
